

Autonomous Finance & Beyond

Moving from Transactional Processing to Strategic Agility

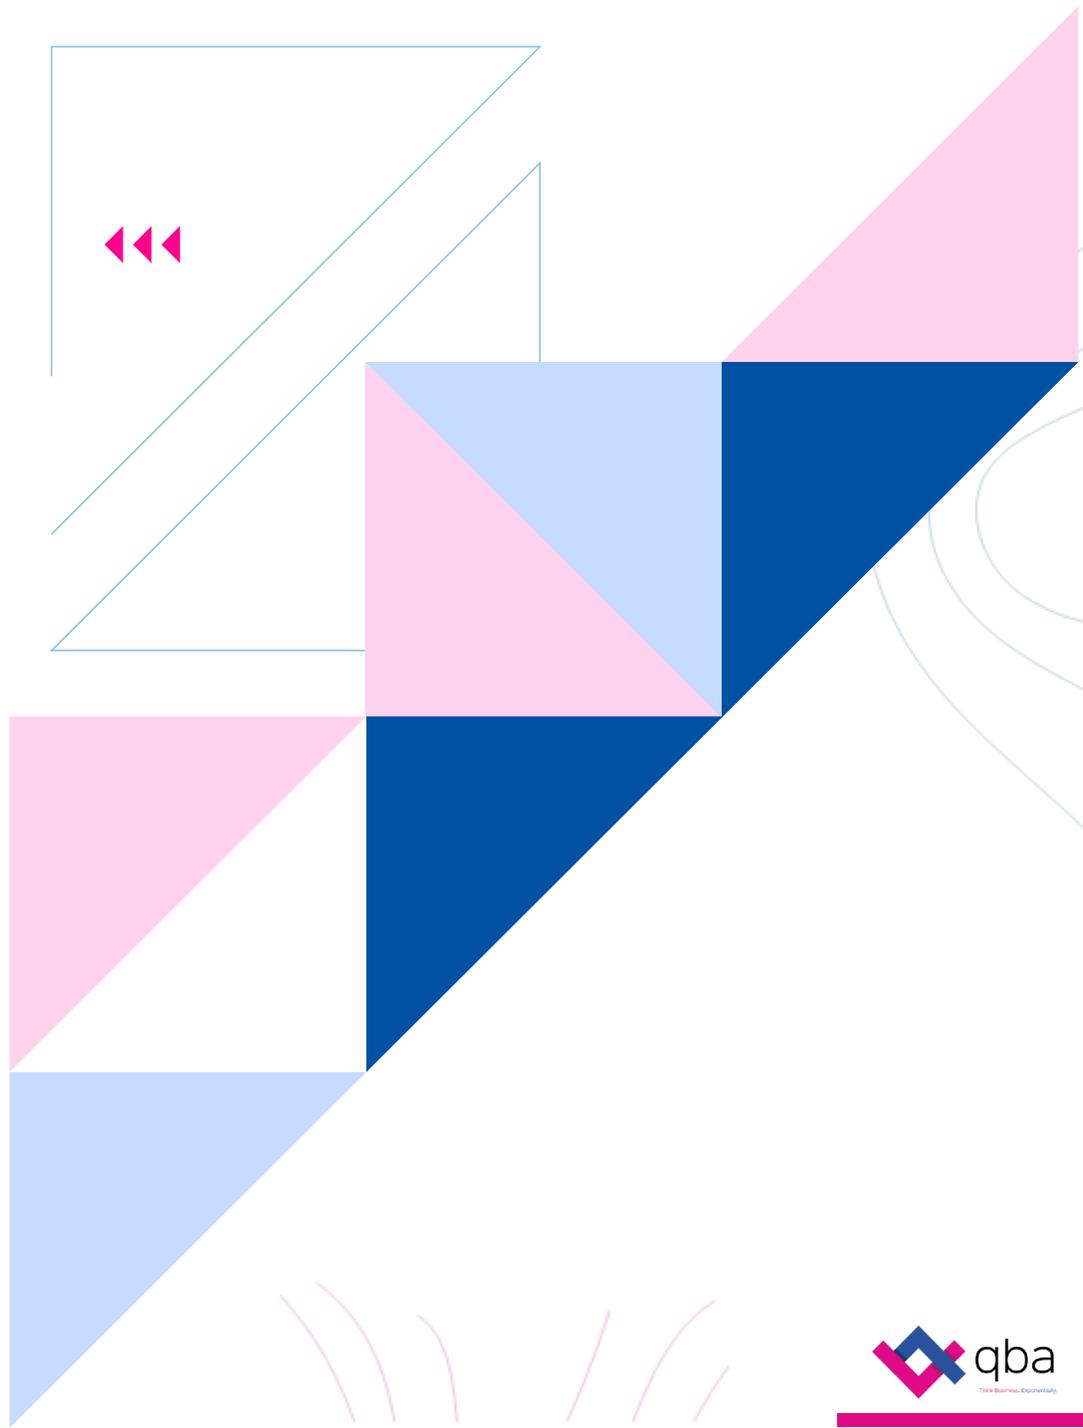

Agentic AI

AI powered FinOps

Automated AP

Automated AR

Multi-agent solutions

The Three Barriers Killing in FinOps

Manual Ingestion

High manual effort to process KYC forms, invoices, and contracts.

Compliance Vulnerability

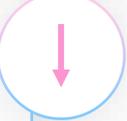

Risk of regulatory breaches (HIPAA, AML, ITAR) due to human error.

Process Latency

Slow turnaround times causing revenue leakage and poor satisfaction.

ROI Measured in KPI Metrix

	Current State	QBA Agentic FinOps
 Cycle Time	36 Days	7 Days
 Straight-Through Processing	53%	89%
 Processing Costs	High	60% – 80% 
 False Positives	High	95% 

VS

A fundamental step-change in operational yield.

From Following Rules to Executing Decisions

01

Rules-Based (RPA)

Action: **Doing**

Input: Structured Data Only Logic:
If/Then Scripts

02

Generative AI

Action: **Creating**

Input: Unstructured Text/Images
Logic: Summarization & Generation

03

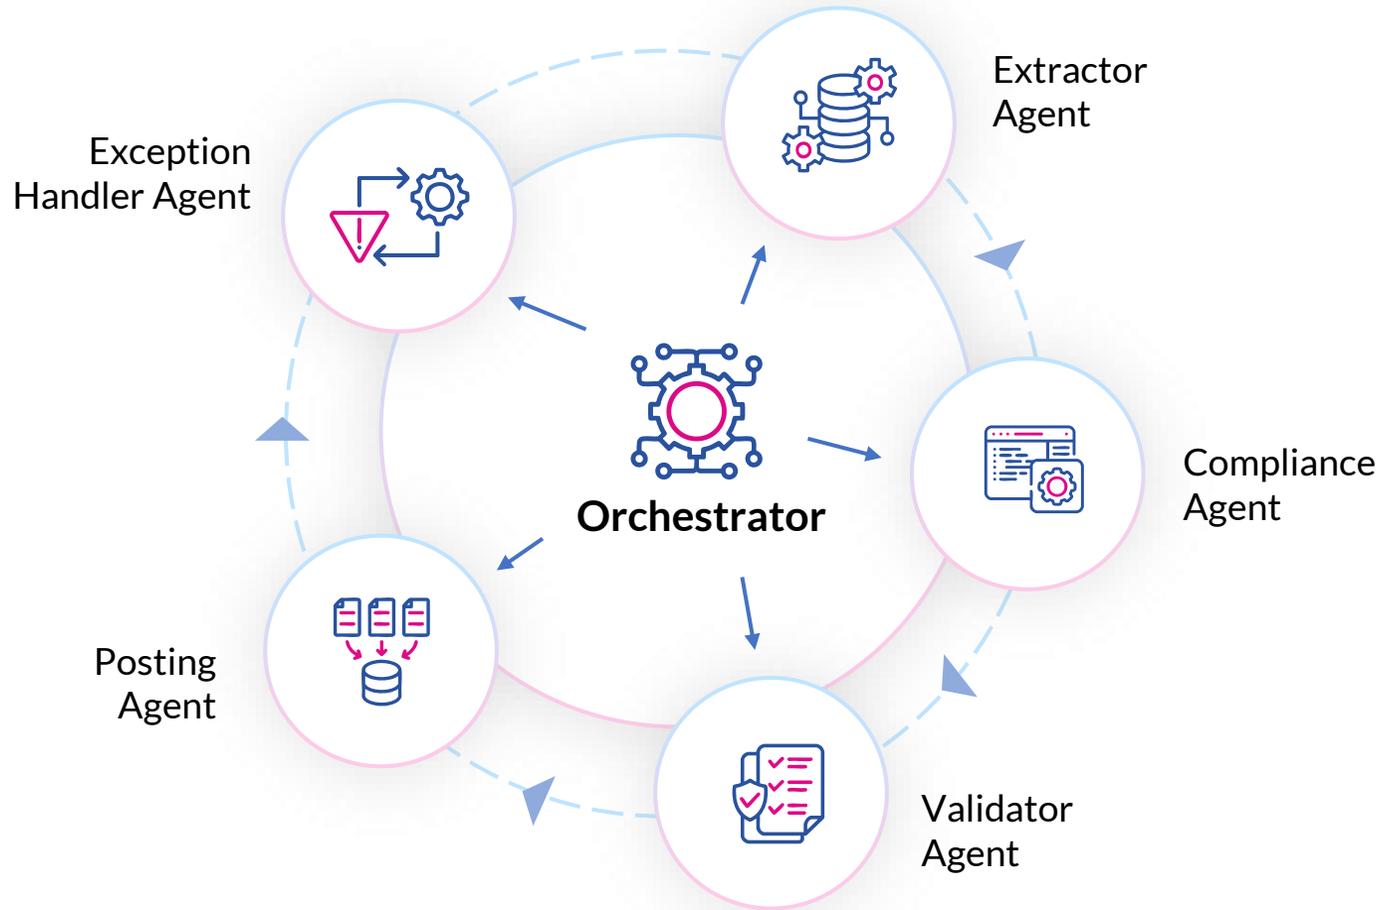

Agentic AI

Action: **Reasoning**

Input: Ambiguous Data+ Context
Logic: Decision-Making & Tool Use

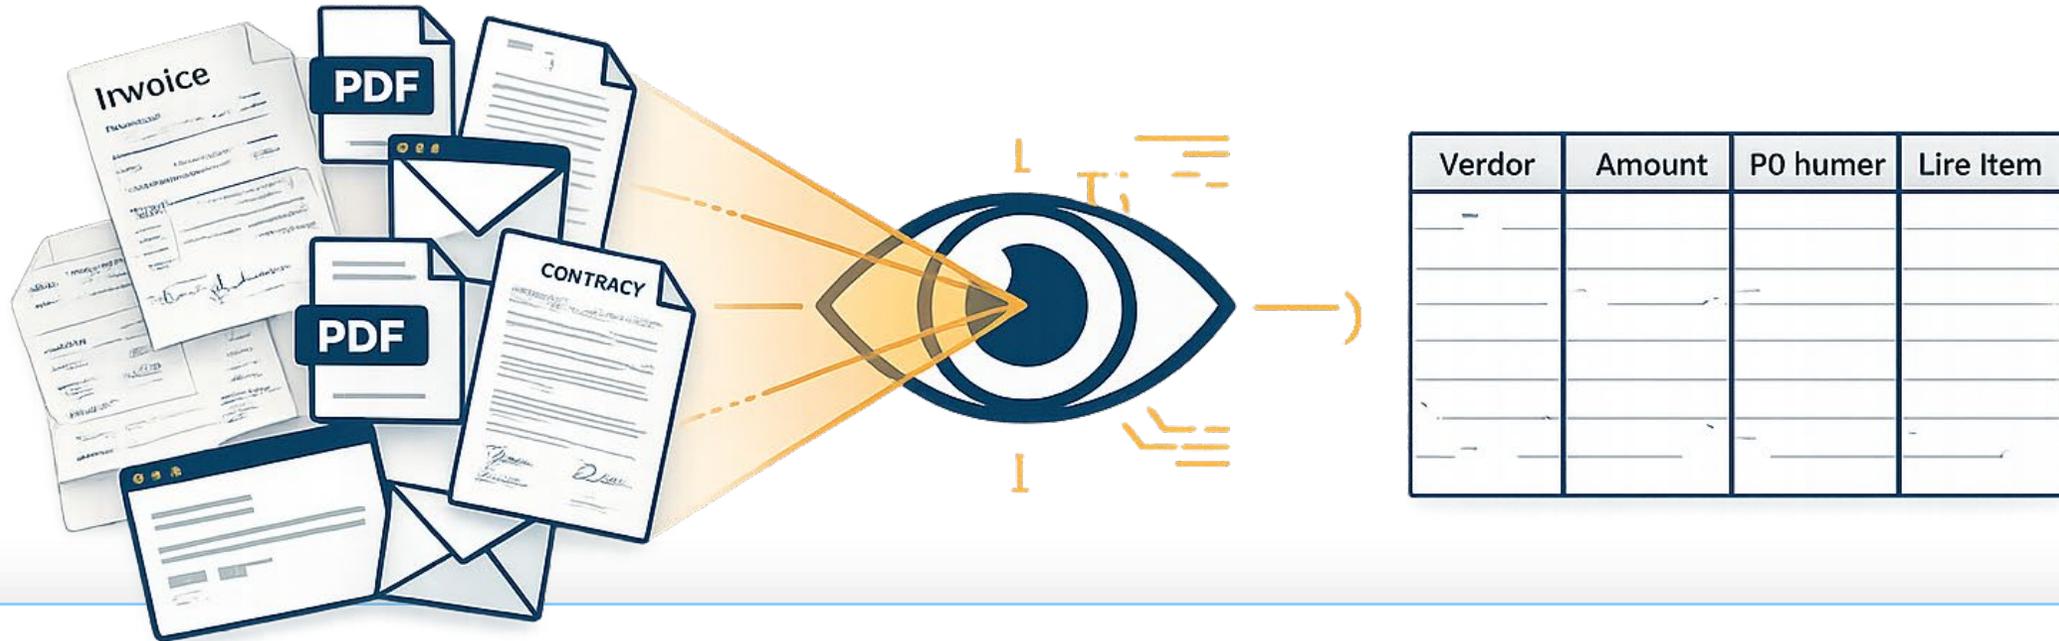

The Shift: We have moved beyond simple scripts. Agentic AI provides the 1brains1 to reason through complex ambiguity.

Meet Your Digital Finance Team

An autonomous team.
The Orchestrator manages the workflow while specialist agents handle specific tasks, mimicking a high-performing human team.

The Extractor Agent: Universal Document Intake

Semantic Understanding

Reads context like a human (97% accuracy), not just templates

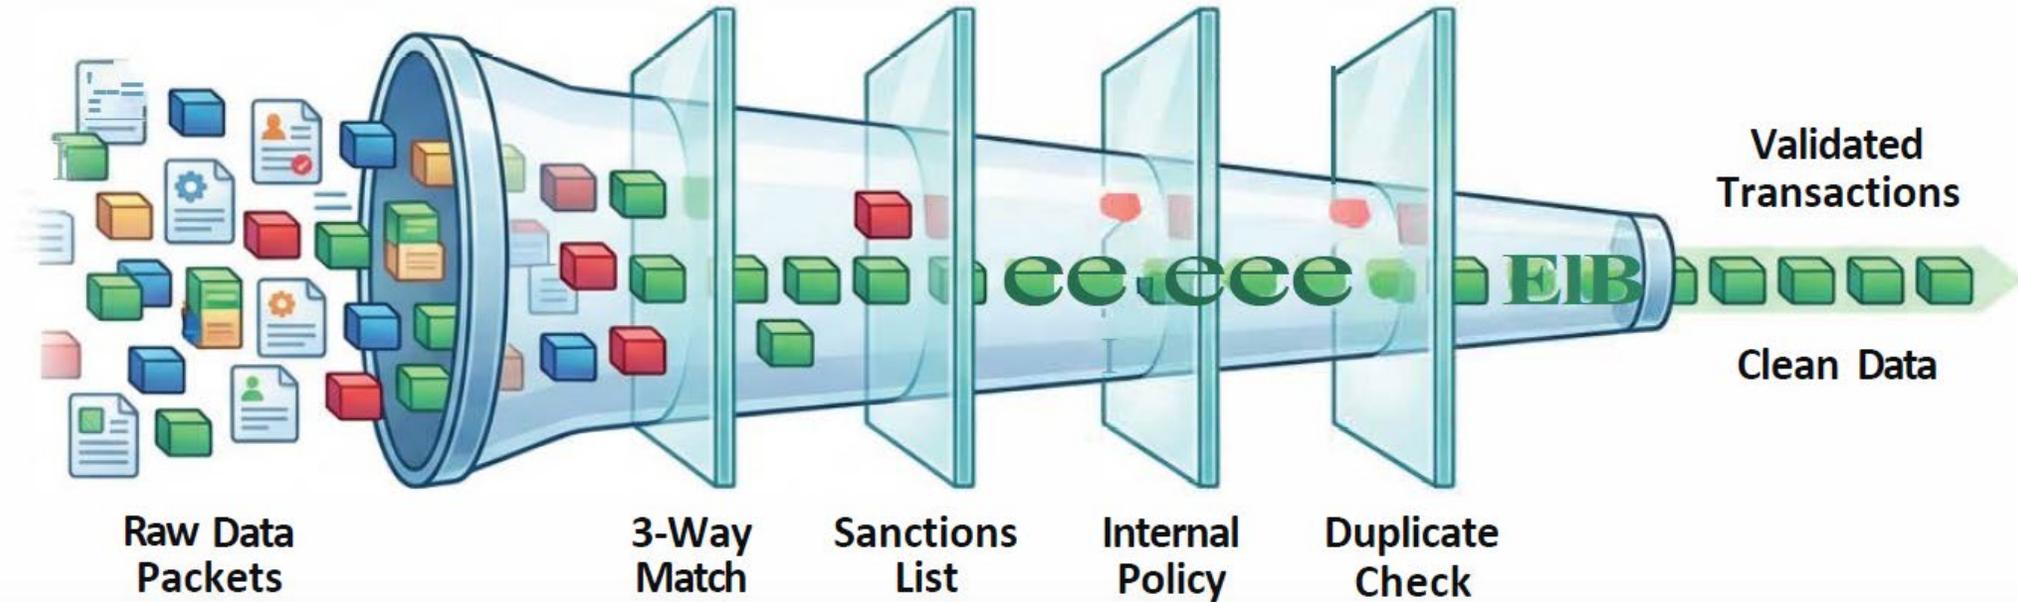

Smart Inference

Infers missing PO numbers by cross-referencing project codes

Agnostic

Handles any format, any language, without pre-training

The Extractor Agent: Universal Document Intake

100% Validation

Every single line item is validated against policy, not just a sample

Reasoning

Investigates discrepancies (e.g., partial shipments) rather than blindly blocking them

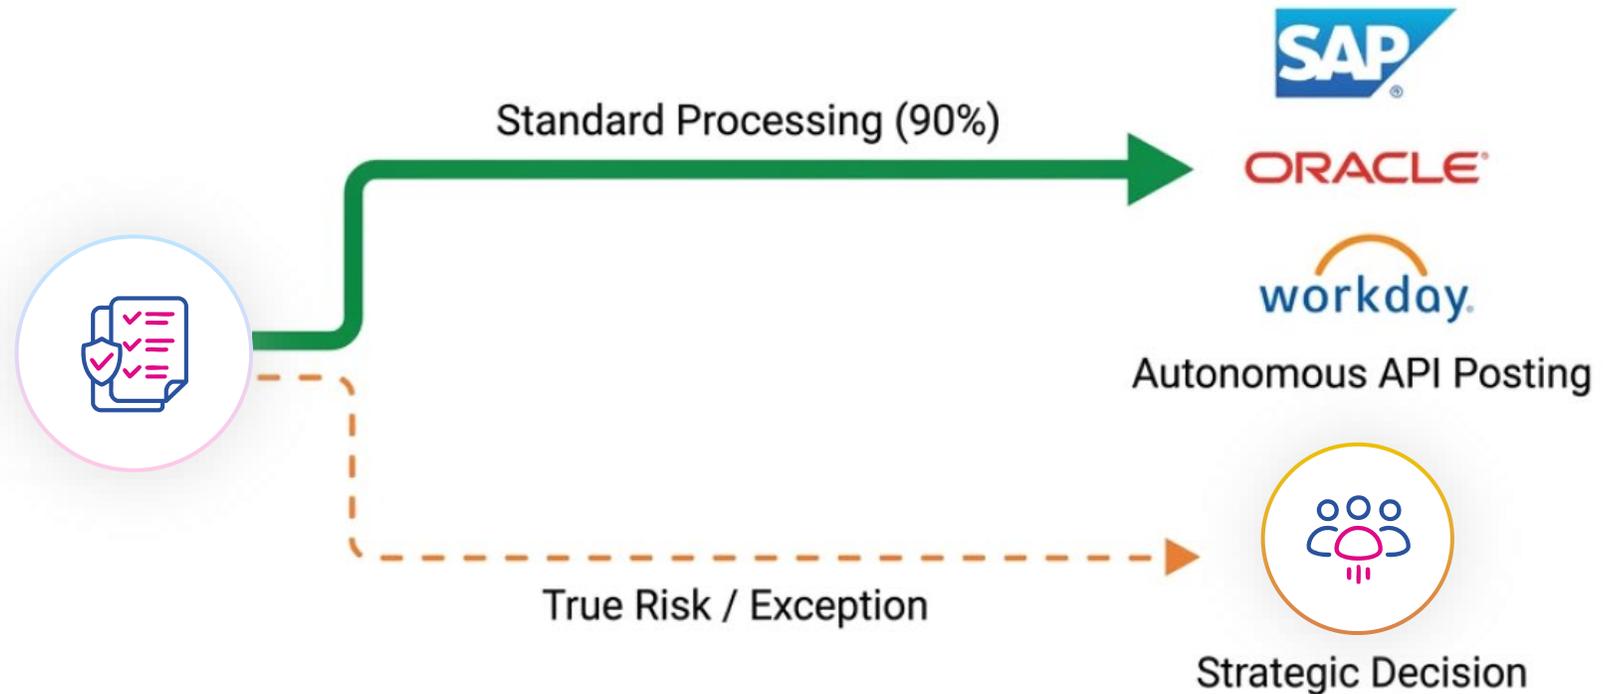

Impact

Reduces false positives by 30-95%.

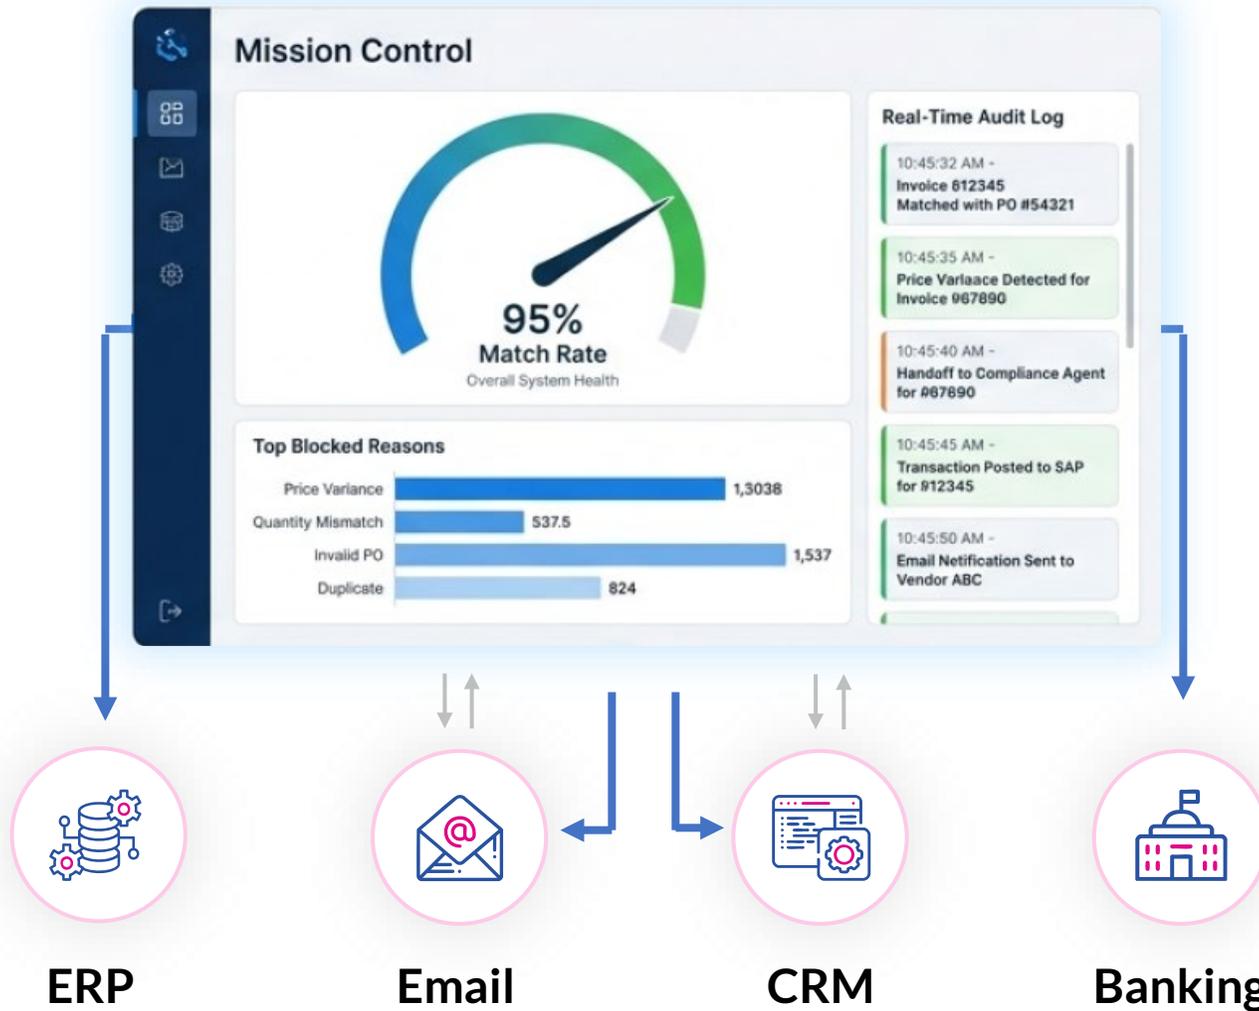

The Posting Agent: Turning Risk into Decision Points

Human-by-Exception Strategy:

Humans are elevated from data entry to strategic decision makers for complex edge cases

The Orchestrator: The Brain of the Operation

Memory:
Learns from past interactions.

Coordination:
Manages handoffs between agents

Audit:
Creates an immutable log of every action

Efficiency Today, Strategic Agility Tomorrow

Cost

~70%

OpEx Reduction

People

~90%

Staff Redeployed to Strategy

Speed

~80%

Faster Cycles

Risk

~0%

Compliance Breaches

Enabling the Continuous Close and optimizing working capital.
